Profile

I am currently a computer engineering student pursuing a Bachelor's degree in Technology (B.Tech). Additionally, I am actively involved in web development.

Education

2021 - Present **B.Tech. Computer Engineering**
Jamia Millia Islamia, New Delhi

Projects

- **E-Commerce Website - [BFurnitures](#)**
 - Developed a responsive ecommerce website using Next.js, MongoDB, and Tailwind CSS, resulting in a seamless user experience across devices.
 - Implemented JWT authentication to ensure secure user login and protect sensitive customer data on the ecommerce platform.
 - Integrated MongoDB as the database solution, optimizing data storage and retrieval for efficient product management and order processing.
- **ChatApp - [Batuno](#)**
 - Built a real-time chat application using Socket.io, React, and Node.js, enabling seamless communication between users and facilitating instant messaging functionality.
 - Implemented MongoDB as the database solution to store and retrieve chat messages, ensuring efficient data management and scalability.
 - Developed a responsive user interface using React and Tailwind CSS, resulting in an intuitive and visually appealing chat application.
 - Integrated authentication and authorization features using JWT to ensure secure access and protect user privacy within the chat app.

Skills

- **Programming:** C, C++, Javascript
- **Front-End:** React, Tailwind, html and css
- **Back-End:** Node, Express, MongoDB, Mongoose
- **Tools:** Visual Studio Code, Git, Postman, Linux
